

About Project

The project aims to develop a mobile application that connects soccer fans, players, and supporters by providing real-time match updates. Users attending matches can share live event information (e.g., goals, cards) with those unable to be there. The app enhances fan engagement, supports community building, improves accessibility, and helps manage soccer clubs effectively. It also encourages interaction among fans and gathers feedback for continuous improvement

The Problems

Lack of Real-time Communication

No direct communication between in-person attendees and remote supporters.

Disconnected Fans

Fans unable to attend matches miss out on live updates and engagement.

Weak Community Building

Limited interaction and community support among soccer club fans.

Limited Accessibility

Fans of all ages and tech backgrounds struggle to access match information

Supporters' Isolation

Parents and supporters are disconnected from their teams during matches.

The Goal

Streamline Club Management

Offer tools for efficient club and user management.

Provide Real-time Updates

Keep fans informed about match events, even when they can't attend.

Build a Strong Community

Create a space for fans to connect, share, and support their soccer clubs.

Boost Fan Engagement

Connect remote fans with their teams through live updates and interaction.

Enhance Accessibility

Develop an easy-to-use app suitable for all users, regardless of age or tech experience.

Proposed Solution

Live Match Updates

Enable users attending matches to share real-time events like goals and cards

Real-time Notifications

Keep fans updated with instant notifications on match progress.

Fan Interaction

Allow fans to support players remotely by upvoting and engaging in discussions.

User-friendly Interface

Design an easy-to-navigate app for all users, regardless of age or tech skills.

Community Building

Create a platform for users to share content, interact, and support their soccer clubs.

Key Features of Platform

Real-time Match Updates

Users attending matches can provide live updates (goals, cards, substitutions) to remote fans, ensuring they stay informed instantly.

Live Group and Personal Chat

Fans can interact through live group chats or one-on-one personal chats, discussing matches and engaging with fellow supporters.

Report feature

Users can report inactive accounts or those providing false information.

Team and Club Selection

Users can select specific teams or clubs they want to support and receive personalized updates for those teams.

Football Game Creation Feature

Users can create and manage football games, including scheduling matches and inviting players.

Player Management System

Club administrators can manage player profiles, track performance, and facilitate communication between players and fans.

User Flow

Sign Up/Login
User will register/sign in

Club, team and player selection
Select the club, team and players.

Create game
Create game for schedule time

Enjoy game with other users
Provide/receive update to/from other users by providing update

Live chat
Live chat with other users

Report
Users can report inactive or misleading accounts

Admin Flow

Login
Admin logs into the system.

Dashboard
Displays graphs, pie charts, and listings.

User Management
Admin can add, update, or remove users.

Club, Team, and Player Management
Admin can add, update, or remove clubs, teams, and players

Game Management
Admin manages game schedules and details.

Broadcast
Admin can send promotional messages to users.

Additional Features we offer

Multi-language Support
The platform supports multiple languages, ensuring accessibility for users from diverse backgrounds - Dutch, English, French

Light and Dark Mode
The app offers both light and dark mode options for a personalized and comfortable user experience.

Admin Panel
Allows managing users, content, grants, and rewards.

Community Features
Group chats, announcements, and peer-to-peer communication

Referral System
User can refer the app to their friends and family members

Transaction History
Users can view detailed records of all the payments

Mobile & Web
Fully responsive on Android, iOS, and desktop browsers

Help & Support
Users can reach out to the admin for assistance and share their issues
