Feedback 11/04/03

General:

- Complimentary Tickets should send pdf with tickets in the email(still dummy pdf). If an organiser sends 5 tickets today and the email is sent, and then sends another 2 tickets after, the second email sent should only contain 2 tickets, not 7 (5+2).

- When clicking on event, please show top of the page not the bottom.
- Change order of event details: Top section first(photos, date/time ect.), About event, Organiser, Artists, Interested, Related Events.
- In events detail page, show event saved ribbon, ability to remove or to save an event.
- Saved events are not being added to the saved events, so save events button not yet adding event. Ribbon is changing ok, but not being added to the MyEvents section
- When there is a notification, the bell should show that there is a notification (and/or how many).

User Website:

- Home
    - Top section still not changing background when event changes.
    - Show the end date aswell in the event bubble(only in website)

Please check the designs for the calendar and the images above and fix.

- Add to calendar function in event details page, what calendar is it being added to? No synchronistation etc?
- Location should be clickable and should redirect to google maps, like application.

- These are tickets on the website, please fix photo make them similar to the app

Web Panel feedback
- When sending to specific user, the send to, should work as a search. Currently does not work.
- Message does not show on notification
- APK did not receive notification on phone (received it on app)

- Delete Event does not work
- How can we see metrics of the events?
- Total Tickets - either change to total tickets sold or total ticket batches (i am not sure what it is)
- Why is upcoming events 0?
- When clicking on the images, i should be taken to the appropriate sections, not zooming in on the photo

-
- Weekly/Monthly button does not work
