### FAN Mounting schedule

To Whom May Concern,

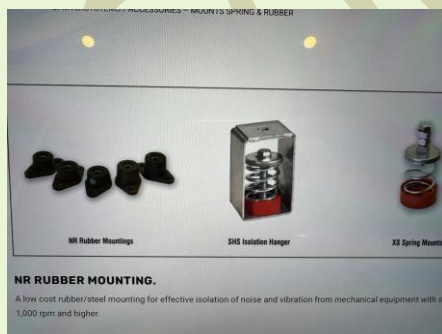

We already have site inspection for 168 Clayton Rd, Clayton. As the regulation and installation request from client we need to bring the exhaust fan close to middle of the roof to reduce the noise when it's working and also install exhaust fan with anti-vibration to avoid vibration transfer to roof and fan base . Please see some picture below for our fans mounting methods:

Vertical fan installation

Horizontal Fan installation with hanger box or anti vibration rubber

Fan Anti-Vibration equipments
